PROFILE

Enterprise software and integration engineer with 8+ years of progression from service desk to staff software developer, now bridging IBM i systems to Azure/.NET at Murphy-Hoffman. At Burns & McDonnell I led the QTS modernization to Azure, built OAuth/Azure-token REST integrations, and automated licensing, archiving and data-normalization workflows that removed hundreds of admin hours a year. I work end-to-end across the stack — RPGLE/CL, Python, .NET, React, APIs, SQL, Docker and CI/CD — with a bias for replacing manual processes with verifiable automation.

EXPERIENCE

Programmer/Analyst — Murphy-Hoffman Company (MHC Kenworth) (2025-10–Present)
Build and integrate business applications on IBM i, connecting RPG/CL programs to Azure, Python and .NET services.

- Develop and maintain RPGLE/CL applications for core business operations on IBM i.
- Integrate IBM i with Azure-hosted APIs and Python/.NET services.
- Work with stakeholders to replace manual workflows with supported automation.

Staff Software Developer — Burns & McDonnell (2023-03–2025-09)
Led architecture and modernization work across the QTS platform and internal integrations.

- Led the QTS modernization to Azure hosting.
- Built secure REST integrations using OAuth and Azure tokens.
- Automated licensing, storage archiving and data normalization, saving hundreds of admin hours annually; mentored developers through code review.

Staff IT System Specialist — Burns & McDonnell (2023-01–2023-03)
Directed ServiceNow architecture changes for enterprise request handling.

- Designed new catalog modules and automation that streamlined requests for thousands of users.
- Integrated ServiceNow workflows with Azure-hosted services, including ESRI backup automation; documented decisions for governance.

Assistant IT System Specialist — Burns & McDonnell (2022-07–2023-01)
Built and supported application modules and service-catalog workflows on the Now platform.

- Translated business requirements into documented technical solutions.
- Supported implementations through the full software development life cycle.

Assistant IT Applications Specialist — Burns & McDonnell (2021-08–2022-07)
Supported enterprise applications and customer-facing issue resolution.

- Resolved escalated customer issues and maintained the support knowledge base.
- Researched, verified and documented product defects to improve release quality.

End User Support Technician — Burns & McDonnell (2017-06–2021-08)
Deployed and supported software and hardware for engineers in the office and the field.

Laptop Repair Technician — Heartland Services Inc (2016-08–2017-06)
Diagnosed and repaired Panasonic laptops and tablets, including board and LCD replacements.

PROJECTS

Selected Technical Projects
Encrypted operations console and browser terminal (AES-GCM, SSH/tmux, cost analytics, monitoring). Container control plane (FastAPI + Docker SDK over 52 containers, guarded actions behind Cloudflare Access). Disposable-container CI harness (static, unit/API/UI, hardcode scans). Self-hosted career automation pipeline (n8n, NocoDB/PostgreSQL, LLM fit scoring, ATS-checked resumes).

SKILLS

Enterprise & Integration: IBM i / RPGLE, CL, Azure, .NET / C#, REST / OAuth, ServiceNow, Microsoft 365, Exchange Online, Entra ID, Intune, Active Directory, SCCM
Languages & Frameworks: Python, TypeScript, JavaScript, C#, SQL, React, FastAPI
Cloud & Delivery: Azure, Docker, Linux, Cloudflare Zero Trust, Cloudflare Access, CI/CD, GitHub Actions, PostgreSQL
Automation & AI: n8n, NocoDB, LLMs, RAG, Prompt engineering, Multi-agent systems, Ollama, OpenCode / DeepSeek
Operations & Security: Uptime monitoring, Backups and DR, Self-healing automation, AES-GCM, SSH / tmux

EDUCATION

Southern New Hampshire University — Computer Science (2020–2022)
Coastal Carolina Community College — Computer Programming (2013–2015)
University of North Carolina at Charlotte — Computer Science (2012–2013)
