PROFILE

Full-stack and AI systems engineer building software, automation, and AI tooling that runs enterprises. Over eight years at Burns & McDonnell modernizing Microsoft 365 and ServiceNow at enterprise scale, now bridging IBM i platforms to Azure at Murphy-Hoffman Company. n8n and LLM pipelines, RouteLLM routing, multi-agent systems, and local LLMs — all deployed governance-first under Zero Trust. Strong across Python, TypeScript, .NET, React, FastAPI, Docker, PostgreSQL, and CI/CD.

SKILLS

Full-Stack Development — Advanced: Python, TypeScript, React, Next.js, .NET, C#, FastAPI, SQL, PostgreSQL
AI / LLM Engineering — Advanced: LLMs, RAG / retrieval, Prompt engineering, Multi-agent systems, RouteLLM, OpenAI-compatible API, Ollama
Automation Orchestration — Expert: n8n, NocoDB, JobSpy, PowerShell, ServiceNow, Workflow Automation
Cloud & Infrastructure — Advanced: Azure, Docker, Linux, Cloudflare Zero Trust, Terraform, CI/CD, GitHub Actions
Enterprise Platforms — Expert: Microsoft 365, Exchange Online, Entra ID, Intune, Active Directory, SCCM
Legacy & Integration — Advanced: IBM i, RPG/CL, System i, REST APIs, OAuth, Azure tokens

EXPERIENCE

Programmer/Analyst — Murphy-Hoffman Company (MHC Kenworth) (2025-10–Present)
Developed and enhanced business applications on the IBM i platform (RPG/CL); integrated Azure, Python, and .NET with legacy systems to boost efficiency; collaborated with stakeholders to design solutions that streamline operations.
Staff Software Developer — Burns & McDonnell (2023-03–2025-09)
Designed, coded, and tested software for business challenges; led architecture and modernization incl. QTS modernization for Azure hosting; built secure REST API integrations (OAuth, Azure tokens); automated IT processes (licensing, storage archiving, data normalization) saving hundreds of admin hours annually; mentored developers via code reviews.
Staff IT System Specialist — Burns & McDonnell (2023-01–2023-03)
Directed ServiceNow architectural changes: new catalog modules and automation streamlining request handling for thousands of users; integrated workflows with Azure-hosted services incl. ESRI backup automation; documented technical decisions with governance compliance.
Assistant IT System Specialist — Burns & McDonnell (2022-07–2023-01)
Developed ServiceNow modules and catalog workflows; analyzed requirements and documented technical solutions; troubleshot SDLC issues.
Assistant IT Applications Specialist — Burns & McDonnell (2021-08–2022-07)
Troubleshot critical issues; built and maintained knowledge-base articles; documented product defects to improve quality.
End User Support Technician — Burns & McDonnell (2017-06–2021-08)
Deployed software to engineers locally and in the field; assisted with software/hardware issues.
Laptop Repair Technician — Heartland Services Inc (2016-08–2017-06)
Diagnosed and repaired Panasonic computers/tablets; board/LCD replacements; streamlined repair processes.

PROJECTS

Job Search Automation Dashboard — https://jobdashboard.christianscherer.dev
Automated job-search pipeline: daily JobSpy scraping, a verified evidence-backed skill inventory, LLM-based fit scoring, and tailored resume PDF + cover letter generation (n8n, NocoDB, FastAPI, Python).
RouteLLM CLI Development Pipeline — https://routellm.abacus.ai

Integrated RouteLLM, an OpenAI-compatible LLM routing gateway, as the single endpoint in the dev pipeline for agentic and automation workflows.

Local LLM / AI Agent Orchestration

Homelab stack orchestrating local LLMs and multi-agent workflows with Ollama; containerized, isolated, accessed via Zero Trust.

IBM i to Azure Integration Bridges

Bridging core IBM i (RPG/CL) business systems to Azure with Python/.NET integration layers, modernizing legacy platforms without rewriting.

EDUCATION

Southern New Hampshire University — Computer Science (2020–2022)
Coastal Carolina Community College — Computer Programming (2013–2015)
University of North Carolina at Charlotte — Computer Science (2012–2013)
