PROFILE

Enterprise integration and automation architect with a decade of IT experience and eight years at Burns & McDonnell. I led the QTS platform's Azure cloud modernization, designed OAuth-based REST APIs, and automated licensing, archiving and data workflows that removed hundreds of administrative hours a year. I work across Azure, .NET, Python and IBM i, turning manual processes into secure, supported systems. I design and operate an applied-AI operations platform on a self-hosted production stack, including agentic workflows. I provide technical leadership through architecture decisions, documentation and mentoring, and work with cross-functional teams to deliver automation strategy. Relocating to Brighton / Greater London; open to integration architecture, automation and solutions engineering roles.

EXPERIENCE

Programmer/Analyst — Murphy-Hoffman Company (MHC Kenworth) (2025-10–Present)
Design and integrate business systems on IBM i, connecting RPG/CL programs to Azure, Python and .NET services.

- Design integrations between IBM i (RPGLE/CL) and Azure, Python and .NET services.
- Partner with stakeholders to define requirements, design interfaces and support production systems.
- Replace manual workflows with documented, supported automation.

Staff Software Developer — Burns & McDonnell (2023-03–2025-09)
Led architecture and modernization across the QTS platform and internal integrations.

- Led architecture and delivery of the QTS platform's Azure modernization.
- Designed secure REST integrations using OAuth and Azure tokens across internal platforms.
- Automated licensing, storage archiving and data normalization, removing hundreds of administrative hours annually.
- Mentored developers through code review and documented architecture and governance decisions.

Staff IT System Specialist — Burns & McDonnell (2023-01–2023-03)
Directed ServiceNow architecture changes for enterprise request handling.

- Designed catalog modules and automation that streamlined requests for thousands of users.
- Integrated ServiceNow workflows with Azure-hosted services, including ESRI backup automation.

Application & Support Roles — Burns & McDonnell (2017-06–2023-01)
Progressed through Assistant IT System Specialist, Assistant IT Applications Specialist and End User Support Technician roles. Began in hardware repair at Heartland Services Inc (2016–2017).

- Translated business requirements into documented technical designs for ServiceNow catalog and workflow changes.
- Resolved escalated application issues and supported engineers in office and field environments.

PROJECTS

OP-E Console & Secure-Term — https://www.christianscherer.dev/projects
Designed and operate an end-to-end encrypted AI operations console and browser terminal (TypeScript/React, AES-GCM, WebCrypto, SSH/tmux), with cost analytics, monitoring, recall, model routing and a supervised remote-desktop gateway.

Career Automation Stack — https://www.christianscherer.dev/projects/jobdashboard
Built a self-hosted job and contract automation pipeline on n8n, NocoDB/PostgreSQL, FastAPI and LLM fit scoring, with an evidence-based skill inventory, ATS-safe resumes and background-job processing.

Agent-Test & Command Deck — https://www.christianscherer.dev/projects
Built a disposable-container CI harness for static, unit/API/UI and hardcode checks, plus a config-driven Docker control plane with health probes and guarded actions behind Cloudflare Access.

SKILLS

Integration & Architecture: Enterprise integration, Solution architecture, API design, REST / OAuth, Azure, ServiceNow, IBM i / RPGLE, CL, .NET / C#, Legacy modernization, Governance
Automation & Delivery: Workflow automation, Process design, CI/CD, Docker, Linux, Cloudflare Zero Trust, Monitoring, Backups / DR, Agile delivery, Documentation
Data & Applied AI: Python, SQL, PostgreSQL, LLMs, RAG, Multi-agent systems, Model routing, Ollama, Applied AI
Languages & Frameworks: TypeScript, JavaScript, C#, React, FastAPI, PowerShell
Collaboration: Stakeholder management, Requirements analysis, Team collaboration, Mentoring, Code review

EDUCATION

Southern New Hampshire University — Computer Science — BS, 4.0 GPA, Summa Cum Laude (2020–2022)
Coastal Carolina Community College — Computer Programming, Associate (2013–2015)
University of North Carolina at Charlotte — Computer Science coursework (2012–2013)
