PROFILE

Enterprise IT engineer with 8+ years across support, ServiceNow and software development, now building full-stack and AI systems. I bridge IBM i platforms to Azure/.NET at Murphy-Hoffman, after modernizing Microsoft 365 and ServiceNow at Burns & McDonnell. My work centers on integration and automation: secure APIs, evidence-gated CI, container operations, local LLM and speech services, and the observability, self-healing and backups that keep them running behind Cloudflare Access and a Zero Trust tunnel.

SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, C#/.NET, SQL, React, FastAPI, RPGLE/CL
AI & Data: LLMs, RAG, Multi-agent systems, Prompt engineering, Ollama, OpenAI-compatible APIs, n8n, NocoDB, PostgreSQL
Cloud & Delivery: Azure, Docker, Linux, Cloudflare Zero Trust, Cloudflare Access, CI/CD, GitHub Actions, Neon Postgres, Render, Vercel
Operations & Security: Cloudflare Access / Zero Trust tunnels, AES-GCM, SSH, tmux, Uptime monitoring, Backups and DR, Self-healing automation
Enterprise Platforms: Microsoft 365, Exchange Online, Entra ID, Intune, Active Directory, ServiceNow, SCCM

EXPERIENCE

Programmer/Analyst — Murphy-Hoffman Company (MHC Kenworth) (2025-10–Present)
Build and integrate business applications on IBM i, connecting RPG/CL programs to Azure, Python and .NET services so legacy workflows can join modern automation.

- Develop RPGLE/CL applications for core business operations on IBM i.
- Integrate IBM i with Azure-hosted APIs and Python/.NET services.
- Partner with internal stakeholders to replace manual handling with supported workflows.

Software Developer & ServiceNow Lead (progressive roles) — Burns & McDonnell (2017-06–2025-09)
Progressed from end-user support to ServiceNow architecture and staff software development over eight years.

- Staff Software Developer (Mar 2023–Sep 2025): led QTS modernization to Azure hosting; built OAuth and Azure-token REST integrations; automated licensing, storage archiving and data normalization, saving hundreds of admin hours annually; mentored developers through code review.
- Staff IT System Specialist (Jan–Mar 2023): directed ServiceNow catalog and workflow changes for thousands of users; integrated workflows with Azure-hosted services, including ESRI backup automation.
- Assistant IT System Specialist / Applications Specialist (Jul 2022–Jan 2023): built ServiceNow catalog modules and workflows; translated business requirements into documented solutions; resolved escalated support issues.
- End User Support Technician (Jun 2017–Jul 2022): deployed and supported engineering software and hardware in the office and the field.

Laptop Repair Technician — Heartland Services Inc (2016-08–2017-06)
Diagnosed and repaired Panasonic laptops and tablets, including board and LCD replacements, and streamlined triage.

PROJECTS

OP-E Console / Secure-Term — Encrypted Operations Console & Browser Terminal
End-to-end encrypted browser terminal and AI operations console: encrypted sessions, cost and token analytics, searchable session history, a read-only monitor that flags anomalies and suggests fixes, multi-model review, a supervised remote-desktop gateway, and a live architecture view. Python stdlib server, AES-GCM (WebCrypto), paramiko SSH into persistent tmux, constant-time auth, no inbound ports.
Command Deck — Container Control Plane & Tool Console

Config-driven control plane and 43-tool console over a 52-container Docker stack: live discovery, health probes, host and container stats, and guarded actions. FastAPI and Docker SDK behind a scoped socket proxy, with Cloudflare Access JWT verification.

Agent-Test — Disposable-Container Verification Pipeline

CI harness that runs static analysis, unit/API/UI tests and hardcode scans in ephemeral containers, gating merges on reproducible results without touching live services.

Selected Technical Systems

JobDashboard / Career OS: n8n orchestration, NocoDB on PostgreSQL, JobSpy ingestion, an evidence-based skill inventory, LLM fit scoring, ATS-safe resumes and cover letters, company research and interview prep. Contract Radar: contract discovery, submissions, invoicing, chase-ups and encrypted backups. Command Center: sanitised disaster-recovery repo with pinned submodules, backup/restore and rebuild runbooks.

EDUCATION

Southern New Hampshire University — Computer Science (2020–2022)
Coastal Carolina Community College — Computer Programming (2013–2015)
University of North Carolina at Charlotte — Computer Science (2012–2013)
